

Halqa — Work Register to Operational at 100,000 Users

24 September 2026, revision 3. 646 items: 31 done, 23 partly done, 592 open.

Scope note

Revision 3 rewrites section C after an audit of every screen in the running application on 24 September 2026. The audit found that the look of the application is the smaller problem. Four screens crash on open, nine screens show product terms the Statutory Position of 23 September says Halqa no longer offers, the live sign-in page at halqa-seven.vercel.app prints a demo account's password, and sign-up takes ten steps. Section C now covers every screen, sign up and sign in redesigned from nothing, and the rules that apply to all of them.

Order of work: A and B are nearly finished; C3 and C4 come next, then C1 and C2, then the rest of C. Every status below was confirmed by opening the screen, not taken from the code.

Sections A to D concern the interface, 338 items. Sections E to R concern everything else.

A. Brand, theme and the visual system

The application already carries a bright green ramp in its stylesheet. It is not applied consistently, five competing accent themes sit beside it, and the supporting material was drawn in a different palette entirely. This section makes one palette govern everything.

#	Item	Location	Status
1	Adopt the bright green ramp as the only brand palette, across the application, the maps, the deck and every document	index.css	Done
2	Retire the pine, sand, clay, indigo and plum accent themes, which	index.css:569	Done

	dilute the brand and triple the visual QA surface		
3	Remove the accent picker from the appearance screen and reduce it to light and dark	AppearancePage.tsx	Open
4	Publish the token set as the single source of truth: ramp, neutrals, status, radii, elevation, spacing	new tokens.css	Done
5	Replace every hard coded colour literal in components with a token reference	40 components	Open
6	Define three named elevations and delete every one off shadow value	six stylesheets	Partly done
7	Define one spacing scale and remove every off scale margin and padding	six stylesheets	Partly done
8	Define a type scale with named roles and remove every one off font size	six stylesheets	Partly done
9	Select and self host one display typeface rather than relying on the system stack, which renders	index.css:47	Done

	differently on every handset		
10	Select and self host an Urdu typeface that sets Nastaliq correctly	index.css	Done
11	Subset and preload both typefaces so the first paint does not shift	index.html	Partly done
12	Normalise every icon to one family, one stroke weight and one grid size	components	Open
13	Replace the mascot with a flat brand device, or remove it; in its present form it overlaps content on the home, committees, credit and account screens	RafaBot.tsx	Done
14	Give the assistant a fixed entry point in the header rather than a floating character	RafaBot.tsx	Partly done
15	Redraw the green header as a defined surface with a controlled edge rather than a slab carrying a stray lighter circle	index.css:53	Done

16	Make the header treatment identical on every screen that uses one	HomePage, CreditPage, ProfilePage	Partly done
17	Replace the blue credit score ring, which clashes with the brand, with the brand ramp	CreditPage.tsx, ProfilePage.tsx	Done
18	Stop the score ring being clipped by the header edge on the account screen	ProfilePage.tsx	Done
19	Replace the red outgoing arrows in the activity list, which read as errors, with a neutral treatment	HomePage.tsx	Done
20	Establish a status colour convention and document it: success, warning, failure, information	tokens	Done
21	Define one card component with a fixed radius, padding, border and elevation, and route every surface through it	ui.tsx	Partly done
22	Stop nesting grey tiles inside white cards, which produces a muddy surface	CreditPage.tsx	Open

23	Define one list row component with a title, an optional subtitle, an optional leading icon and an optional trailing control	ui.tsx	Partly done
24	Make every list row either carry a subtitle or not, rather than mixing the two in one list	ProfilePage.tsx	Open
25	Define one button component with primary, secondary, tertiary and destructive variants and three sizes	ui.tsx	Partly done
26	Define one form field component with label, hint, error and disabled states	ui.tsx	Partly done
27	Define one badge component and stop badges overlapping the tile above them	HomePage.tsx	Partly done
28	Define a skeleton for every card, list and chart; the application presently carries five in total	ui.tsx	Partly done
29	Define an empty state component with an illustration slot, a sentence and an action	ui.tsx	Partly done

30	Define an error state component with a reason and a retry	ui.tsx	Partly done
31	Add a dark theme and honour the system preference	tokens	Partly done
32	Add a reduced motion preference and honour it in every transition	tokens	Done
33	Produce a one page visual specification for anyone building a new screen	documentation	Open
34	Fold the five stylesheets that accumulated outside the system into the token set and delete them	styles-*.css	Open

B. Navigation and application chrome

Three different navigation patterns are presently in use and the floating controls collide with content and with one another.

#	Item	Location	Status
35	Settle one navigation pattern: a large left aligned page title, a back affordance where one applies, and at most two trailing actions	all pages	Partly done

36	Remove the centred bare title bar used on the committees screen	CirclesPage.tsx	Done
37	Remove the grey circle back button used on the credit screen and adopt the standard affordance	CreditPage.tsx	Done
38	Stop the join button overlapping the start a committee button on the committees screen	CirclesPage.tsx	Done
39	Stop the join button label being cut off at the bottom of the viewport	Shell.tsx	Done
40	Decide whether joining is a tab, a floating button or a grid action; at present it is all three	Shell.tsx, HomePage.tsx	Done
41	Remove the vault tab while the surface is withdrawn	Shell.tsx	Done
42	Reduce the tab bar to four destinations and give each a filled and an outline state	Shell.tsx	Done
43	Add a search entry point to the home header, which both reference applications carry	HomePage.tsx	Done

44	Add a notifications entry point with an unread count that clears on read	HomePage.tsx	Partly done
45	Respect the safe area inset at the bottom on handsets with a gesture bar	index.css	Done
46	Respect the safe area inset at the top on handsets with a notch	index.css	Done
47	Give every screen a working hardware back behaviour	App.tsx	Partly done
48	Preserve scroll position when returning to a list	App.tsx	Open
49	Add a page transition that communicates depth rather than a hard swap	App.tsx	Done
50	Add a loading indicator for navigation between lazy boundaries	App.tsx	Done
51	Give every one of the twenty eight screens a deep link that restores its full state	App.tsx	Done
52	Fix the committee deep link, which presently shows an	App.tsx, CommitteePage.tsx	Done

	unending loading indicator		
53	Add a context line inside a committee so the member knows which circle they are in	CommitteePage.tsx	Open
54	Add a bottom sheet component and use it for secondary actions rather than navigating away	ui.tsx	Partly done
55	Add a modal component with focus trapping and an escape route	ui.tsx	Partly done
56	Add a confirmation pattern for destructive actions, with the consequence stated	ui.tsx	Partly done

C. Every screen rebuilt to the wallet standard

Every screen except Home is rebuilt to the standard of the JazzCash, Easypaisa and SadaPay applications, studied from their own store screenshots on 23 September 2026. The audit behind this section was made on 24 September 2026 by opening every screen of the running application at phone width: 28 screens, the five committee tabs, the sign-in and sign-up screens, and the 25 components that render inside them. Home is the one screen kept as it stands. Sign up and sign in are redesigned from nothing. Part C1 applies to every screen and is checked on each one as it is rebuilt; parts C3 and C4 are done first, because C3 is a legal exposure and C4 is a screen that does not open.

C1. Rules that apply to every screen

#	Item	Location	Status

57	No bezels: no bordered or framed container around a section, and never a card inside a card. Surfaces are separated by fill and space	all screens	Open
58	No rounded pill or badge shapes, under the standing design rule. Buttons, chips, filters and status labels use square or lightly rounded corners; status is an icon, a colour and a word. The component set built on 23 September uses pill buttons and pill badges and is corrected first	system.css, all screens	Open
59	No emojis in any screen, share text or notification. The country flag in the number field is the one the app shows today; the API's document verification page carries two symbols	PhoneInput.tsx:13, halqa-api/src/app.ts:106	Open
60	No playful or self-referential copy: the assistant's greeting lines, exclamation marks,	RafaBot.tsx, rafa-knowledge.ts, index.html, AuthPage.tsx, ErrorBoundary.tsx	Open

	the tab title "Committee savings, made rewarding", the sign-in slogan, and the error screen's "not a ledger one"		
61	No over-explaining: at most one line of supporting text under a title. Every explanatory paragraph is cut, or moved behind a single How it works link	all screens	Open
62	No list-of-rows navigation. A screen whose job is to send the member somewhere becomes an icon grid and cards, in the manner of the JazzCash and Easypaisa inner pages. Rows stay only where the content is itself a ledger: payments, members, turns	ProfilePage, SettingsPage, VerifyPage, ReferPage, FeesPage, AutoPayPage	Open
63	No eyebrow labels above titles and no capitalised section labels; nine files carry them	AgreementGate, Appearance, CnicCapture, CollectionOrder, ExitSheet, JoinSheet, AuthPage, CommitteePage, CreateCirclePage	Open

64	No stack of equal-weight panels. A screen opens with its one answer, then the evidence, then the actions. The committee's first tab stacks six panels	CommitteePage.tsx:79	Open
65	No decorative circles on any header, hero or band	AuthPage, RewardsPage, VaultPage, HyperPage, CommitteePage	Open
66	No off-brand colour on a surface: the orange streak card, the blue status chip, the blue information rule	RewardsPage, CommitteePage, MarketplacePage	Open
67	No raw undefined, NaN or null on screen. Seen on Rewards (Points NaN, Longest run undefined, NaN to go) and on the committee Safety tab (score undefined against every member). Every number and name passes through a guard	format.ts, RewardsPage, ProtectionCenter	Open
68	No segmented control that wraps to two lines; the committee tabs do	CommitteePage	Open

69	Row actions (Remove, Make default, Remind) open in a sheet from the row, instead of sitting as buttons under every row	CardsPage, ProtectionCenter	Open
70	No truncated title in a header; the committee name is cut to "Gulshan ..."	CommitteePage	Open
71	Every screen checked in dark mode as it is rebuilt, since the older stylesheets hard code white	all screens	Open

C2. Sign up and sign in, redesigned from nothing

The individual onboarding and identity screens are listed in section D. This part sets the flow and the standard they are built to.

#	Item	Location	Status
72	Remove the demo credentials printed on the sign-in screen. The line has no environment guard, so "+92 300 1234567 · halqa123" is on the live page for anyone	AuthPage.tsx:538	Open
73	Welcome screen: the mark, one line, and two actions, Create	AuthPage	Open

	account and Sign in. No slogan, no capitalised strapline, no paragraph		
74	Remove the green marketing banner that fills 40 per cent of every sign-in and sign-up screen	AuthPage	Open
75	Sign in with phone number and PIN, as the wallets do. No password	AuthPage	Open
76	Cut sign-up from ten steps to five: phone, code, name, CNIC, PIN. Address, work, bank account and review move to verification after the account exists, where they open seats rather than block entry	AuthPage.tsx:48	Open
77	Drop the password step. The PIN is the credential on the device and a phone code recovers it	AuthPage	Open
78	The question is the heading of each step, not "Step 1 of 10"; progress is a thin bar only	AuthPage.tsx:542	Open
79	Phone entry: +92 fixed, numeric	PhoneInput.tsx	Open

	keypad, digits grouped as they are typed, no flag		
80	Code entry: six boxes, automatic advance, paste from the SMS, resend with a visible countdown, and a change number link	AuthPage, otp step	Open
81	PIN set and confirm on a full screen numeric keypad of its own, matching the unlock screen	AuthPage, PinLock	Open
82	CNIC step opens the camera capture first and typing second	AuthPage, CnicCapture	Open
83	Remove the card-within-a-card frame around every step	AuthPage	Open
84	Remove the nine-link website footer (Cookie Policy, Ad Choices, Advertising and the rest) from sign in; its links also run together with no spaces. Terms and privacy become one line under the final button	LegalFooter.tsx	Open
85	One specific error per field, shown under	AuthPage	Open

	that field, and a retry on network failure		
86	Forgotten PIN: phone code, then a new PIN	AuthPage	Open
87	Sign-up tested end to end against a staging API, since it cannot be tested on production without creating a real account	testing	Open

C3. Retired terms still shown on screen

These screens tell a member things the Statutory Position of 23 September says Halqa does not do. They are fixed before anything else in section C.

#	Item	Location	Status
88	HYPER shows "30 days · 7 collect a day · 210 members" and "Rs 500 a day for 30 days". Replace with the two fixed configurations and the three way split	HyperPage.tsx	Open
89	HYPER entry checks ask for "Daily earnings, or a vault balance" with a "Vault minimum Rs 15,000". Remove the vault	HyperPage.tsx	Open
90	Fees lists an early-turn fee that "goes to the other	FeesPage.tsx	Open

	members" and turn selling at "whatever the buyer bids". Remove both		
91	Fees does not list the service fee at all. Add the flat fee per instalment by instalment size and roster size, and the hyper split	FeesPage.tsx	Open
92	Pay says "No charge to contribute. Raast is instant and free." State the fee on every payment	PayPage.tsx	Open
93	The committee screen carries a chip reading "Turn pricing · 1% early fee → late bonus". Remove it from every circle	ui.tsx TurnPricingChip, CommitteePage	Open
94	The committee Safety tab shows "Payout holdback 15% — On", "Deposit held" and "Payout held back". Remove them	ProtectionCenter.tsx	Open
95	The committee Safety tab shows "Credit-weighted turns — On". That ordering was replaced by score bands; remove it	ProtectionCenter.tsx	Open

96	The turn marketplace says Buy a turn, for sale, bid, and List one of my turns. Recast as a zero-price swap throughout, and rename the Home tile to Swap a turn	MarketplacePage.tsx, HomePage.tsx	Open
97	The vault is still reachable by link, showing a "Recorded balance" earning "11.19% a year" and "Cover a missed instalment, settled from this balance". Make it unreachable until the distributor registration exists	VaultPage.tsx, App.tsx	Open
98	Save for something promises the member will "own it outright" at Halqa's "Rs 50 a month". Hold it until the leasing structure exists	AssetPage.tsx	Open
99	About states "What a member pays Halqa: Rs 0" and calls Halqa "a record that cannot be argued with"	AboutPage.tsx	Open
100	Remove every remaining use of record, recorded or recording to describe what Halqa is	all screens	Open

C4. Screens that crash

#	Item	Location	Status
101	Support crashes on open with "Something broke on this screen": it reads tickets.length from an unchecked response	SupportPage.tsx:62	Open
102	Statement crashes on open: it reads totals.paidInPaisa from an unchecked response	StatementPage.tsx:68	Open
103	Limits crashes on open	LimitsPage.tsx:36	Open
104	Devices crashes on open	DevicesPage.tsx:31	Open
105	Preview mode has no data for these four endpoints, which is what exposes the missing guards. Add it, since preview is the mode used for demonstrations	preview.ts	Open

C5. Screen by screen

#	Item	Location	Status
106	Home: fix the truncated due in	HomePage.tsx	Open

	figure, which reads 2 days, 23 and stops		
107	Home: replace total recorded with a phrase that names the figure	HomePage.tsx	Done
108	Home: state what the member owes next, and when, as the first thing on the screen	HomePage.tsx	Open
109	Home: search field in the header, as both reference applications carry	HomePage.tsx	Done
110	Home: customisable action grid with an edit control, as JazzCash does	HomePage.tsx	Open
111	Home: reduce the grid to actions used weekly and move the rest behind a More tile	HomePage.tsx	Open
112	Home: every grid tile the same icon size, label length and tap target	HomePage.tsx	Open
113	Home: New and Popular badges inside the tile bounds, and then replaced, since badges fall under the standing rule	HomePage.tsx	Partly done

114	Home: activity grouped by date	HomePage.tsx	Open
115	Home: each activity row opens its receipt	HomePage.tsx	Open
116	Home: circles held as a horizontal card carousel rather than stacked cards	HomePage.tsx	Open
117	Home: pull to refresh	HomePage.tsx	Open
118	Home: a skeleton for every block rather than a full screen spinner	HomePage.tsx	Open
119	Committees: design the single item case, which leaves half the screen empty	CirclesPage.tsx	Open
120	Committees: committee cards at full contrast; they read as disabled	CirclesPage.tsx	Done
121	Committees: search across the circles held	CirclesPage.tsx	Open
122	Committees: filters for status, cadence and role	CirclesPage.tsx	Open
123	Committees: sort by next due date, amount and name	CirclesPage.tsx	Open
124	Committees: design the Discover tab, an unstyled list today	CirclesPage.tsx	Open

125	Committees: design the zero circles empty state	CirclesPage.tsx	Open
126	Committee: header uses a grey circle back button, cuts the name to "Gulshan ..." and carries a Member view pill. Rebuild on the standard page header	CommitteePage.tsx	Open
127	Committee: in preview the hero says "Your turn is 1 of 12" while the order below shows the member at turn 3, and reads "Turn 4 of 2". Confirm against production data and correct the formula	CommitteePage.tsx	Open
128	Committee: the Running status sits in a blue pill	CommitteePage.tsx	Open
129	Committee: the loading state that never resolved when a circle is opened by link	CommitteePage.tsx	Done
130	Committee: replace the six second polling loop with a subscription, or lengthen it with backoff	CommitteePage.tsx:261	Open

131	Committee: a clear payment state per member, with a filter for unpaid	CommitteePage.tsx	Open
132	Committee: the member's own position and next due date above everything else	CommitteePage.tsx	Open
133	Committee: chat in its own tab rather than a section in a long scroll	CommitteePage.tsx	Open
134	Committee: an unread marker on the chat tab	CommitteePage.tsx	Open
135	Committee: a members tab with standing, seat and payment history	CommitteePage.tsx	Open
136	Committee: a rules tab restating the configuration the member agreed to	CommitteePage.tsx	Open
137	Committee, turns tab: six stacked panels become one hero, the turn strip, and the members grid	CommitteePage.tsx:7 9	Open
138	Committee, safety tab: a list of fourteen switches becomes three cards: what protects this circle, what happens when	ProtectionCenter.tsx	Open

	someone is late, and the member's own standing		
139	Committee, payments tab: rebuilt to the rules	CommitteePage.tsx	Open
140	Committee, messages tab: a chat layout in the manner of the wallets	CommitteePage.tsx	Open
141	Credit report: remove the assistant bubble that covered the affordability section	CreditPage.tsx	Done
142	Credit report: last three instalments labelled with dates and amounts	CreditPage.tsx	Open
143	Credit report: score chart with an axis, dates and a readable scale	CreditPage.tsx	Open
144	Credit report: each score factor explained with the member's own figures	CreditPage.tsx	Open
145	Credit report: internal score and any bureau figure separated and labelled	CreditPage.tsx	Open
146	Credit report: the stat strip of three grey	CreditPage.tsx	Open

	tiles inside a white card		
147	Account: rebuilt as a grid of tiles under three headings, in place of the long list	ProfilePage.tsx	Open
148	Account: the credit report control in the header as a real button	ProfilePage.tsx	Open
149	Account: a sign out control, absent today	ProfilePage.tsx	Open
150	Create a circle: uses its own header (a Back text link, an eyebrow, a small title) instead of the standard one	CreateCirclePage.tsx	Open
151	Create a circle: the step chips are pills and the third is cut off	CreateCirclePage.tsx	Open
152	Create a circle: "Give the circle a name first" shows before the member has typed anything	CreateCirclePage.tsx	Open
153	Create a circle: full cost of the configuration, every fee included, before commitment	CreateCirclePage.tsx	Open
154	Create a circle: validate each step before the next opens	CreateCirclePage.tsx	Open

155	Create a circle: live preview of the schedule as the configuration changes	CreateCirclePage.tsx	Open
156	Pay: the amount reads "Rs 10000", unformatted, with Rs sitting below the figure	PayPage.tsx	Open
157	Pay: half the screen is empty; the rail choice or a keypad belongs there	PayPage.tsx	Open
158	Pay: the three parts of the payment shown before the member confirms	PayPage.tsx	Open
159	Pay: any rail charge shown before the rail is chosen	PayPage.tsx	Open
160	Pay: pending, settled and failed states, with a reason on failure	PayPage.tsx	Open
161	Schedule: in preview shows Nothing due while Home shows an instalment due in two days. Confirm against production data	SchedulePage.tsx	Open
162	Schedule: a calendar as well as a list	SchedulePage.tsx	Open

163	Statement: exportable as a file	StatementPage.tsx	Open
164	Rewards: the orange streak card, the grey tiles inside a white card, and reward titles cut mid-word. Rebuild as a progress hero and a grid of reward tiles	RewardsPage.tsx	Open
165	HYPER: rebuild as the two configuration cards side by side, with the entry checks as one compact progress figure	HyperPage.tsx	Open
166	Activity: keep it as a ledger, and group each day's rows in one card instead of one card per row	ActivityPage.tsx	Open
167	Payment methods: Remove and Make default buttons under every account move into a sheet; the buttons are pills	CardsPage.tsx	Open
168	Verification: a progress figure and a grid of checks in place of two lists; remove the capitalised VERIFIED label	VerifyPage.tsx	Open
169	Settings: a grid in place of the list; the	SettingsPage.tsx, LegalFooter.tsx	Open

	footer links run together with no spaces		
170	Appearance: remove the accent colour picker, a dead control since the themes were retired	Appearance.tsx	Open
171	Appearance: the photo control renders as a letter and a broken icon	Appearance.tsx	Open
172	Appearance: two titles on one screen (Look and feel, then Appearance and personalisation); theme and language chosen from pills	Appearance.tsx	Open
173	Notifications: Mark everything read has its tick on a line of its own; groups are ordered oldest first	NoticesPage.tsx	Open
174	Invite: the capitalised YOUR CODE label; the bottom button sits behind the tab bar	ReferPage.tsx	Open
175	Auto-pay: the capitalised COLLECTED AUTOMATICALLY label	AutoPayPage.tsx	Open
176	Turn marketplace: grey tiles inside a	MarketplacePage.tsx	Open

	white card, and a blue information rule		
177	Vault: no header and no back control	VaultPage.tsx	Open
178	About: essay paragraphs become three short facts and one link	AboutPage.tsx	Open
179	Error screen: one line and a retry, in place of "Something broke on this screen, your data is safe, this is a display error, not a ledger one"	ErrorBoundary.tsx	Open
180	Search: kept; checked against C1	SearchPage.tsx	Open

C6. Components

Each is rebuilt to the rules in C1.

#	Item	Location	Status
181	Turns you can take: layout rewritten on 23 September; its style is not yet applied and its copy still over-explains	SeatEligibility.tsx	Partly done
182	Circle eligibility	GroupCredit	Open
183	What you would still owe	ForwardLiability.tsx	Open

184	Exit votes	ExitVotes.tsx	Open
185	Collection order	CollectionOrder.tsx	Open
186	Confirming window	ConfirmingWindow.tsx	Open
187	Affordability	Affordability.tsx	Open
188	Score simulator	ScoreSimulator.tsx	Open
189	Fee schedule	FeeSchedule.tsx	Open
190	Collection calendar	CollectionCalendar.tsx	Open
191	Join by code	JoinByCode.tsx	Open
192	Join sheet	JoinSheet.tsx	Open
193	Exit sheet	ExitSheet.tsx	Open
194	Agreements list	MyAgreements.tsx	Open
195	Weekly undertaking overlay	AgreementGate.tsx	Open
196	Protection centre	ProtectionCenter.tsx	Open
197	Risk console	RiskConsole.tsx	Open
198	Invite share	InviteShare.tsx	Open
199	Host card	HostCard.tsx	Open
200	Linked accounts and their manager	LinkedAccounts.tsx, LinkedAccountsManager.tsx	Open
201	Add a payment source	AddSource.tsx	Open
202	CNIC capture	CnicCapture.tsx	Open
203	PIN lock	PinLock.tsx	Open

204	Receipt	Receipt.tsx	Open
205	Growth and projection charts	PersonalGrowthChart.tsx, ProjectionChart.tsx	Open
206	Member status	MemberStatus.tsx	Open
207	Committee photo prompt	CommitteePage.tsx	Open
208	The assistant panel	RafaBot.tsx	Open

D. Screens that do not exist and are required

The application presently carries twenty eight screens. Every item below is a screen a member, a host or an administrator needs and cannot reach, because it was never built or because it exists only as a section inside another screen.

#	Item	Location	Status
209	Welcome and what the product is, shown before the number is asked for	Onboarding	Open
210	Phone number entry, with the reason for the request stated	Onboarding	Open
211	Passcode entry, with resend, a timer and a change number route	Onboarding	Open
212	Set the application PIN	Onboarding	Open
213	Confirm the application PIN	Onboarding	Open

214	Forgotten PIN recovery	Onboarding	Open
215	Biometric enrolment offer	Onboarding	Open
216	Name and date of birth capture	Onboarding	Open
217	Address and city capture	Onboarding	Open
218	Occupation and employer capture	Onboarding	Open
219	Income declaration, with the reason it is asked	Onboarding	Open
220	Income verification upload	Onboarding	Open
221	Income verification status and outcome	Onboarding	Open
222	CNIC front capture with an alignment guide	Identity	Open
223	CNIC back capture with an alignment guide	Identity	Open
224	CNIC manual entry fallback	Identity	Open
225	CNIC review and confirm before submission	Identity	Open
226	Identity check in progress	Identity	Open

227	Identity check failed, with the reason and the next step	Identity	Open
228	Liveness capture instructions	Identity	Open
229	Liveness capture	Identity	Open
230	Verification levels: what each one opens	Identity	Open
231	Bureau instruction, on a screen of its own	Identity	Open
232	Bureau instruction confirmation and record	Identity	Open
233	Adverse action disclosure pack	Identity	Open
234	Linked accounts list	Accounts and rails	Open
235	Add a bank account	Accounts and rails	Open
236	Add a wallet account	Accounts and rails	Open
237	Account title verification in progress	Accounts and rails	Open
238	Account title mismatch, with the route to correct it	Accounts and rails	Open
239	Set the default collection account	Accounts and rails	Open
240	Remove a linked account, with the consequences stated	Accounts and rails	Open

241	Collection mandate explainer	Accounts and rails	Open
242	Authorise a collection mandate	Accounts and rails	Open
243	Mandate authorised confirmation	Accounts and rails	Open
244	Mandate list, one row per circle	Accounts and rails	Open
245	Vary a mandate ceiling	Accounts and rails	Open
246	Cancel a mandate, with the consequences stated	Accounts and rails	Open
247	Mandate cancelled confirmation	Accounts and rails	Open
248	Mandate collection failed, with the reason and the manual route	Accounts and rails	Open
249	Advance notice of a differing amount	Accounts and rails	Open
250	Circle templates, for a member who does not know what to configure	Circles	Open
251	Cadence chooser, with a plain explanation of each	Circles	Open
252	Roster size chooser, with the pot shown live	Circles	Open

253	Seat chooser, with each unavailable seat carrying its reason	Circles	Open
254	Join sheet as a screen of its own	Circles	Open
255	Split disclosure: what each part of the payment is for	Circles	Open
256	Mutual guarantee signing	Circles	Open
257	Undertaking signing	Circles	Open
258	Signature capture	Circles	Open

E. Structural removals arising from the design changes

Each construct below implements the previous design and must be gone before the merchant services agreement is executed.

#	Item	Location	Status
339	Set SIMPLE_MODE to true, withdrawing the vault, turn market and earning engines from the build	halqa-web/src/config.ts:21	Open
340	Delete the turn premium ledger entry from buyer to seller	routes/exchange.ts:156	Open
341	Delete the ten per cent marketplace fee taken on that premium	routes/exchange.ts:157	Open
342	Remove premiumPaisa from listing creation	routes/exchange.ts:69	Open
343	Remove competitive bidding on listings	routes/exchange.ts:95	Open
344	Remove the fifty per cent of payout	routes/exchange.ts:84	Open

	premium ceiling, now redundant		
345	Retain the swap itself as a zero premium exchange on every tier	routes/exchange.ts	Open
346	Remove earlyFeeBps from the create schema and every dependent branch, fourteen occurrences	routes/committees.ts	Open
347	Remove the engine copy describing an early fee paid to other members	routes/committees.ts: 326	Open
348	Remove dividendPooled and the patience weighted split between members	routes/committees.ts, schema.prisma	Open
349	Remove prizeDrawEnabled from the schema, the create route and round processing	schema.prisma:357, routes/committees.ts: 203	Open
350	Delete bidAprBps	lib/hyper.ts:109	Open
351	Delete MAX_APR_BPS	lib/hyper.ts:59	Open
352	Delete MAX_DAY_ONE_PAISA	lib/hyper.ts:61	Open
353	Rewrite the hyper header comment,	lib/hyper.ts:1	Open

	which presently describes a priced advance and an annualised ceiling		
354	Re express the hyper seat price as a flat fee payable to Halqa rather than a bid between members	lib/hyper.ts	Open
355	Unmount the vault route until the distributor registration exists	app.ts:139	Open
356	Stop populating accruedYieldPaisa on security deposits	schema.prisma:504, routes/protection.ts	Open
357	Stop creating payout holdbacks	schema.prisma:521	Open
358	Gate the float sweep and the mudarib fee behind the distributor registration	lib/sukoon.ts:23	Open
359	Remove the vault auto cover path from the delinquency pass	services/delinquency.ts	Open
360	Remove rate and cover copy from six front end files	rafa-knowledge.ts, format.ts, HyperPage.tsx, ProfilePage.tsx, VaultPage.tsx, preview.ts	Open
361	Remove the Halqa cover facility from the fee book	lib/fee-book.ts	Open

362	Confine asset committee code behind a flag pending the leasing structure	lib/asset-committee.ts , AssetPage.tsx	Open

F. Structural additions arising from the same changes

#	Item	Location	Status
363	Seat graded fee payable to Halqa, implementing the grid by instalment size and roster size	lib/fee-book.ts	Open
364	Correct the per instalment fee constant, which presently stands at Rs 50 against a directed grid of Rs 100 to Rs 500	lib/fee-book.ts	Open
365	Flat fee rule on the daily cadence, asserted in code so a graded fee cannot be configured there	lib/hyper.ts	Open
366	Three way split engine: contribution, takaful contribution and service fee, each to its own ledger account	new lib/split.ts	Open
367	Assert identity one at creation: pot equals contribution multiplied	routes/committees.ts	Open

	by the number of rounds		
368	Assert identity two at creation: roster equals members collecting each period multiplied by the number of periods	routes/committees.ts	Open
369	Points ledger, issued by Halqa, as compensation to later seats	new model	Open
370	Fee waiver credit, issued by Halqa, as compensation to later seats	new model	Open
371	Redemption path for points and waivers against future fees	routes/rewards.ts	Open
372	Host required on every circle, including daily cadence circles	routes/committees.ts	Open
373	Host accountability record: who admitted each member to the roster	new model	Open
374	Seat price display that states a fee in rupees and never a rate	components	Open
375	Bureau consent capture as a separate screen naming the	new page	Open

	bureau and the request		
376	Bureau consent record hashed and timestamped on the pattern of the undertaking	routes/agreements.ts	Open
377	Adverse action pack: the report relied on, the bureau name, address and telephone number, the statutory summary of rights and a statement that the bureau did not decide	new page	Open
378	Review and gate member visible credit scores inside a circle	CommitteePage.tsx	Open
379	Fee schedule surface stating every charge before a member commits	FeesPage.tsx	Open
380	Correct the discount constants to eighty per cent for a cheque, fifty per cent for verified income, and a mandatory salary account	lib/discounts.ts	Open

G. Collection, mandates and rails

#	Item	Location	Status
381	Implement tier one: a Raast request to pay, issued on the due date and settled on one approval	new lib/raast.ts	Open
382	Implement tier two: collection against a token mandate held by the aggregator	new lib/mandate.ts	Open
383	Implement tier three: manual recording against a reference, confirmed by the host	routes/payments.ts	Open
384	Select the tier automatically by cadence, instalment size and the member own history	new lib/collection-policy.ts	Open
385	Mandate register: account, ceiling, cadence, the text authorised, the time and the address	new model	Open
386	Mandate authorisation flow, with the terms stated on their own screen	new page	Open
387	Mandate cancellation inside the application, effective without a call or a form	new page	Open

388	Advance notice where an amount will differ from the amount stated at authorisation	new job	Open
389	Confirmation to the member of every collection taken under a mandate	new job	Open
390	Daily mandate run, sharded, idempotent and resumable	new job	Open
391	Retry policy for a failed mandate collection, with a stated schedule and a ceiling on attempts	new job	Open
392	Reason codes for every failure, mapped to a sentence the member understands	new lib	Open
393	Arrears recorded against the round, never as a negative balance held by Halqa	routes/payments.ts	Open
394	Assertion in code that no member balance can be created	routes/payments.ts	Open
395	Reconciliation against the aggregator settlement report, on a schedule	new job	Open

396	Exception queue for reconciliation breaks	new admin page	Open
397	Refund and reversal path through the same rail, with the ledger entry reversed with it	routes/payments.ts	Open
398	Dispute suspends the mandate while it is open	routes/payments.ts	Open
399	Idempotency key on every settlement, enforced at the database level	schema.prisma	Open
400	Signed callback verification on every provider confirmation	routes/payments.ts	Open
401	Circuit breaker on persistent provider failure, directing members to another rail	lib/payment-provider.ts	Open
402	Title inquiry before an account anchors collection	lib/payment-provider.ts	Open
403	Rail cost display before a charged rail is chosen	PayPage.tsx	Open
404	Rail selection policy documented against instalment size, since a percentage rail consumes a rising share of a flat fee	documentation	Open

405	Consolidated daily notice on the daily cadence, one message rather than one per member per day	new job	Open
406	Merchant services agreement executed with a licensed aggregator	commercial	Open
407	Mandate facility added to that agreement as a commercial term	commercial	Open
408	Sandbox integration completed and signed off	integration	Open
409	Production credentials held in the managed secret store	infrastructure	Open
410	Live rail enabled behind a flag, with a staged rollout	lib/payment-provider.ts	Open
411	Settlement account opened in the company name for fee revenue only	commercial	Open
412	Daily settlement report ingested automatically rather than by hand	new job	Open

413	Payment operations runbook written and rehearsed	documentation	Open
414	Remove the live branch that throws not implemented once the rail is connected	lib/payment-provider.ts	Open

H. Takaful cover

#	Item	Location	Status
415	Corporate insurance agent registration with the Commission	registration	Open
416	Distribution agreement with a licensed takaful operator	commercial	Open
417	Product terms agreed: what is covered, what is excluded, and how it is priced	commercial	Open
418	Takaful contribution taken as a fixed part of every daily payment	lib/split.ts	Open
419	Contribution remitted to the participants risk fund and never held by Halqa	lib/split.ts	Open

420	Separate ledger account for the risk fund, reconciled separately	ledger	Open
421	Cover offered at creation and at join on other cadences, priced per member	new page	Open
422	Cover certificate issued to the member	new page	Open
423	Claim submission with the payment record attached as evidence	new page	Open
424	Claim status visible to the member and to the host	new page	Open
425	Commission from the operator recorded as Halqa revenue and disclosed to the member	ledger	Open
426	Surplus and deficit treatment documented for the member: surplus belongs to participants, deficit is met by an operator advance	content	Open
427	Assertion in code that Halqa never promises to pay on another member loss	review	Open

428	Counsel review of the agency arrangement before cover is offered	legal	Open

I. Savings, trustee and asset manager

#	Item	Location	Status
429	SECP mutual fund distributor registration	registration	Open
430	Distribution agreement with a licensed asset management company	commercial	Open
431	Confirmation that the trust is constituted by deed on paper between the manager and the trustee	legal	Open
432	Money path built member to trustee collection account, never through Halqa	integration	Open
433	Units issued in the member own name and held in the member own account	integration	Open
434	Execution only interface: a menu, with nothing recommended	new page	Open

435	Distribution commission recorded as Halqa revenue and disclosed	ledger	Open
436	No share of fund profit and no management fee, asserted in the agreement	commercial	Open
437	Redemption path back to the member own account	new page	Open
438	Returns stated as indicative and never guaranteed, with the fund named	content	Open
439	Electronic Transactions Ordinance section 31(1)(c) checked: no individual circle constituted as an express trust on an electronic signature	legal	Open
440	Vault route remounted only once the registration is in hand	app.ts:139	Open

J. Credit data

#	Item	Location	Status

441	Subscriber agreement with TASDEEQ, with DataCheck as the alternate	commercial	Open
442	Consent wording drafted to constitute Halqa the member duly constituted attorney	legal	Open
443	Bureau request made only on a member instruction, enforced in code	new lib	Open
444	Instruction record hashed, timestamped and addressed	routes/agreements.ts	Open
445	Bureau report stored separately from the internal score and on its own scale	schema.prisma	Open
446	Adverse action obligation implemented before any score based restriction operates	new page	Open
447	Disclosure limits reviewed: bureau derived information not shown to other members	CommitteePage.tsx	Open
448	Dispute route to the bureau correction process, with the	new page	Open

	entry marked while open		
449	Internal score explained to the member in terms of their own record	CreditPage.tsx	Open
450	Score bands documented and applied only to which seats may be claimed	lib/score.ts	Open
451	Write back of Halqa payment history held until the Federal Government notifies furnishers that are not credit institutions	documentation	Open
452	State Bank register confirmed out of scope, being closed to non banks	documentation	Open
453	Affordability gate held at one third of declared income	lib/affordability.ts	Open
454	Exposure summed across every circle held	lib/exposure.ts	Open
455	Forward liability measured at the point of seat selection	lib/forward-liability.ts	Open
456	New member confinement to the final seats until two clean circles are completed	lib/seat-bands.ts	Open

K. Registrations, legal instruments and governance

#	Item	Location	Status
457	SECP incorporation as a private limited company	registration	Open
458	Memorandum object clause drafted to the restructured model	legal	Open
459	National Tax Number from the Federal Board of Revenue	registration	Open
460	Provincial sales tax registration	registration	Open
461	Company bank account for Halqa own revenue	commercial	Open
462	Trademark filing with the Intellectual Property Organisation	registration	Open
463	Corporate Verisys agreement with NADRA	commercial	Open
464	Member undertaking reviewed by counsel and framed as a liquidated demand	legal	Open
465	Mutual guarantee reviewed by counsel as a separate member to member instrument	legal	Open

466	Collection mandate text reviewed by counsel, stating amount, cadence, ceiling and cancellation	legal	Open
467	Arbitration clause naming the dispute route before a dispute arises	legal	Open
468	Record only clause stating expressly that Halqa holds no member money	legal	Open
469	Member agreement, privacy, cookies, advertising, community and fees, versioned together	legal	Open
470	Written opinion of counsel on limb twelve of the financial institution definition	legal	Open
471	Confirmation that no product surface proposes a payment determined by the drawing of a lot	review	Open
472	Data protection position documented, including where records sit	documentation	Open
473	Record retention schedule for identity	documentation	Open

	and transaction records		
474	Complaints procedure published	documentation	Open
475	Terms acceptance recorded with the version, the hash, the address and the time	routes/agreements.ts	Open
476	Board and shareholding structure settled before the first external agreement	corporate	Open
477	Insurance for the company itself, separate from member cover	commercial	Open
478	Confirmation in writing that no regulatory approval is sought and no sandbox participation is pursued	documentation	Open

L. Data, platform and the path to one hundred thousand members

#	Item	Location	Status
479	Create the migration history; the project presently has no migrations directory at all	prisma/migrations	Open

480	Write and apply the additive SQL for the two user columns that exist in code and not in production	prisma	Open
481	Adopt a migrate deploy step in the release pipeline rather than pushing the schema	pipeline	Open
482	Bound every unbounded query; fifty eight calls presently fetch without a limit	halqa-api/src	Open
483	Add cursor pagination to every list endpoint	halqa-api/src/routes	Open
484	Add an index for every list query and every foreign key that drives one	prisma/schema.prisma	Open
485	Review every N plus one query introduced by nested includes	halqa-api/src	Open
486	Add a connection pool sized for the serverless execution model	prisma	Open
487	Move the delinquency sweep to a sharded job rather than one pass	services/delinquency.ts	Open

488	Move payouts to a queue with retry and a dead letter path	new queue	Open
489	Move notifications to a queue with rate limiting per member	new queue	Open
490	Add idempotency to every job so a retry cannot double process	jobs	Open
491	Add a scheduled job monitor that alerts when a run is missed	monitoring	Open
492	Add caching for reference data rather than fetching it per request	halqa-api/src	Open
493	Add a read path that does not touch the primary for heavy list views	infrastructure	Open
494	Load test the collection path at one hundred thousand members and a daily cadence	testing	Open
495	Load test the round close and payout path at the same scale	testing	Open
496	Measure and record the cost per member per month at that scale	documentation	Open

497	Confirm the serverless execution ceiling is not reached by any job	infrastructure	Open
498	Add point in time recovery and an independent nightly copy	infrastructure	Open
499	Rehearse a restore and record how long it takes	operations	Open
500	Add structured logging with a request identifier carried end to end	halqa-api/src	Open
501	Add error monitoring with alerting to a named person; there is presently none	infrastructure	Open
502	Add performance monitoring on the payment and payout paths	infrastructure	Open
503	Add uptime monitoring on the application, the API and the rails	infrastructure	Open
504	Add a public status page	infrastructure	Open
505	Add a staging environment with its own database	infrastructure	Open

506	Add a documented rollback procedure	operations	Open
507	Add a feature flag service so a surface can be withdrawn without a deploy	infrastructure	Open
508	Review the region placement of the database against the users it serves	infrastructure	Open
509	Add a data export job that produces a member record in full	new job	Open
510	Add a data deletion job that honours a closure request	new job	Open
511	Add an append only audit log, retained separately from the application database	infrastructure	Open
512	Add a double entry assertion that debits equal credits, run on a schedule	new job	Open
513	Add a ledger integrity check against the settlement report	new job	Open
514	Add a bundle size budget and enforce it in the build	pipeline	Open
515	Measure and improve first contentful paint on a low end handset	halqa-web	Open

516	Add an offline path for reading a schedule and a receipt	halqa-web	Open
517	Add a service worker with a considered cache policy	halqa-web	Open
518	Confirm the application works on a two gigabyte handset over a third generation connection	testing	Open

M. Security

#	Item	Location	Status
519	Correct the permissions policy header, which presently disables the camera and breaks CNIC capture in production	halqa-web/vercel.json :11	Open
520	Review the content security policy and remove any unsafe directive	halqa-web/vercel.json	Open
521	Confirm strict transport security across the domain	halqa-web/vercel.json	Open
522	Confirm the cross origin policy admits	halqa-api/src/app.ts	Open

	only the application origins		
523	Rate limit every route, per member and per address, tighter on authentication	halqa-api/src	Open
524	Add a bot challenge before an account is created	routes/auth.ts	Open
525	Add signup velocity limits per device and per address	routes/auth.ts	Open
526	Confirm every route checks membership, hosting or ownership before acting	halqa-api/src/routes	Open
527	Confirm every request is validated against a schema before reaching business logic	halqa-api/src/routes	Open
528	Confirm internal fields never reach the client	halqa-api/src	Open
529	Move every credential into a managed store and rotate on a schedule	infrastructure	Open
530	Encrypt identity images at rest and log every access	infrastructure	Open
531	Confirm rail tokens are held by the	lib/payment-provider.ts	Open

	aggregator and never stored by Halqa		
532	Add server side session revocation and a device list the member controls	routes/auth.ts	Open
533	Add step up authentication before a payout destination is changed	routes/account.ts	Open
534	Add step up authentication before a mandate is authorised	new route	Open
535	Add anomaly detection on collection destination changes	new job	Open
536	Separate administrative access from application access, in named accounts	infrastructure	Open
537	Require two factor authentication on hosting, database and domain accounts	infrastructure	Open
538	Add dependency scanning to the build and fail on high severity	pipeline	Open
539	Add secret scanning across the repository and its history	pipeline	Open

540	Add static analysis for injection and authorisation defects	pipeline	Open
541	Commission a penetration test before real money moves	external	Open
542	Write an incident response plan with a named owner	documentation	Open
543	Write a breach notification procedure	documentation	Open
544	Add a vulnerability disclosure route	documentation	Open
545	Add sanctions and politically exposed person screening at onboarding	new lib	Open
546	Add ongoing monitoring of patterns against the declared profile	new job	Open
547	Add fraud rules for repeated identity submissions and unusual account linking	new lib	Open
548	Add the capability to produce a suspicious transaction report if the obligation is ever held	new job	Open

N. Testing and release

#	Item	Location	Status
549	Add a test suite for the API; there is presently none in the service	halqa-api	Open
550	Unit test the split engine against both hyper configurations	testing	Open
551	Unit test the two identities and confirm a breaking configuration is refused	testing	Open
552	Unit test the fee grid at every band	testing	Open
553	Unit test the discount grid, including that discounts do not stack	testing	Open
554	Unit test the threshold engine at green, amber and red	testing	Open
555	Unit test the exit ladder arithmetic	testing	Open
556	Unit test the delinquency ladder at each step	testing	Open
557	Unit test set off where a member collects and owes in the same round	testing	Open

558	Unit test idempotency on settlement	testing	Open
559	Integration test the whole collection path against the aggregator sandbox	testing	Open
560	Integration test the payout path	testing	Open
561	Integration test mandate authorisation, variation and cancellation	testing	Open
562	End to end test the twenty most common member journeys	testing	Open
563	End to end test the host journeys	testing	Open
564	Visual regression test every screen at three widths	testing	Open
565	Accessibility test every screen against the published criteria	testing	Open
566	Add type checking, linting and tests as required checks on every change	pipeline	Open
567	Add a preview deployment for every change	pipeline	Open

568	Add a release checklist and require sign off	process	Open
569	Add a staged rollout mechanism	pipeline	Open
570	Add a kill switch for the collection job	operations	Open
571	Record a manual test script for the journeys automation does not cover	documentation	Open
572	Run the full suite against production data shapes before the first live collection	testing	Open

O. Content, language and accessibility

#	Item	Location	Status
573	Write every screen in plain language for a member with no financial background	content	Open
574	Remove every term that implies Halqa holds money	content	Open
575	Remove every term that implies a rate, a return or an advance	content	Open
576	Write the Urdu translation of every string, by a translator	content	Open

	rather than by machine		
577	Add a language chooser and remember the choice	SettingsPage.tsx	Open
578	Confirm the layout holds when a string is twice as long	testing	Open
579	Write the error message for every failure reason, in both languages	content	Open
580	Write the empty state for every list, in both languages	content	Open
581	Write the help article for every feature	content	Open
582	Write the onboarding explanation of what a committee is	content	Open
583	Write the explanation of the three way split	content	Open
584	Write the explanation of the mandate and how to cancel it	content	Open
585	Write the explanation of the fee and why it is flat	content	Open
586	Write the explanation of cover and who writes it	content	Open

587	Write the explanation of the credit score and what moves it	content	Open
588	Give every interactive element an accessible name	components	Open
589	Give every image and icon alternative text or an explicit hidden marking	components	Open
590	Confirm every tap target meets the minimum size	components	Open
591	Confirm colour is never the only carrier of meaning	components	Open
592	Confirm contrast on every text and control against the background	components	Open
593	Add a visible focus state to every interactive element	components	Open
594	Confirm the application is usable with a screen reader end to end	testing	Open
595	Confirm the application is usable at the largest system text size	testing	Open

596	Add a text size preference inside the application	SettingsPage.tsx	Open

P. Measurement

#	Item	Location	Status
597	Add product analytics with a defined event taxonomy	infrastructure	Open
598	Instrument the signup funnel end to end	analytics	Open
599	Instrument the identity verification funnel	analytics	Open
600	Instrument circle creation and join	analytics	Open
601	Instrument mandate authorisation	analytics	Open
602	Instrument collection success by rail and by tier	analytics	Open
603	Instrument first payment failure and recovery	analytics	Open
604	Instrument default by circle, by cadence and by seat	analytics	Open
605	Instrument the threshold bands across live circles	analytics	Open

606	Build the operating dashboard: signups, active circles, collection rate, mandate coverage, default rate	admin	Open
607	Build the risk dashboard: expected loss against accumulated cover, per circle	admin	Open
608	Build the finance dashboard: fee revenue, rail cost, commission, net	admin	Open
609	Define the weekly review and who attends it	process	Open
610	Confirm no analytics event carries personal data into a third party	review	Open

Q. Application store and distribution

#	Item	Location	Status
611	Decide between a wrapped web application and a native build, and record the reason	decision	Open

612	Register an Apple developer account in the company name	registration	Open
613	Register a Google Play developer account in the company name	registration	Open
614	Complete Apple financial services declarations	compliance	Open
